

SR-AIIMS HMS

Hospital Management System User Guide

A simple operating manual for reception, doctors, nursing, laboratory, pharmacy, Panchkarma, accounts, HR, housekeeping, inventory, and administration teams.

Audience: Non-technical hospital staff and department heads

Purpose: Explain the daily flow, screen usage, role responsibilities, and safe working practices

Prepared for: Shanti-Ratnam / SR-AIIMS hospital operations

Version: Staff training edition - 2026-06-01

1. Whole HMS Working Flow

The HMS connects patient registration, appointment booking, consultation, tests, medicine, therapy, admission, billing, and reporting. Each department updates its own part of the work so the next department can continue without repeating data entry.

1. Login Staff logs in with their own username and password. The menu changes according to role.	2. Patient Registry Reception searches existing patient or registers a new patient. UHID / registration number is generated by system.	3. Appointment Reception books doctor, date, time slot, department, and complaint. Token/queue appears for today.
--	--	---

Login -> Patient -> Appointment -> OPD Queue

4. Screening / Vitals Nursing or reception records BP, pulse, temperature, weight, height, SPO2, and RR.	5. Doctor OPD Doctor opens queue, records assessment, diagnosis, prescription, lab order, therapy advice, and discharge summary.	6. Lab / Pharmacy / Therapy Lab collects samples and enters results. Pharmacy dispenses medicines. Panchkarma schedules and completes therapies.
--	--	--

Screening -> Doctor -> Lab / Pharmacy / Panchkarma

7. Billing Accounts, reception, or allowed staff create bills, collect payments, and print invoices.	8. IPD / Rooms If admitted, patient is assigned room/bed, bedside notes and vitals are recorded, therapies are scheduled, then discharge is completed.	9. Reports and Admin Management reviews OPD, IPD, revenue, pharmacy, lab, Panchkarma, inventory, and HR reports.
--	--	--

Main Patient Journey

Stage	Department	What is done in HMS	Next output
Registration	Reception	Create patient record or find old patient by UHID, phone, name, father name, OPD/IPD number, or ID number.	Patient profile is ready.
Appointment	Reception	Select patient, doctor, department, date, time slot, visit type, source, and complaint.	Patient appears in today's queue.
Screening	Nursing / Reception	Open OPD queue, start/load consultation, record vitals.	Doctor sees vitals in the visit.
Consultation	Doctor	Enter Ayurveda assessment, diagnosis, medicines, lab tests, therapy plan, diet, lifestyle advice, and follow-up.	Prescription, lab order, therapy advice, and bill request.
Services	Lab / Pharmacy / Panchkarma	Complete ordered tests, dispense medicines, or complete therapy session.	Results, dispensing record, therapy completion, charges.
Payment	Accounts / Reception	Create invoice, add items if needed, collect payment, print invoice.	Paid or pending balance record.
Admission	Reception / Nursing / Doctor	Admit patient in IPD, assign bed, record progress notes and vitals, schedule therapy, discharge and bill stay.	Closed admission and discharge record.

Important habit: Always search before creating a new patient. This avoids duplicate UHID and keeps the patient's history in one place.

2. Basic Screen Use for Everyone

1. Open the HMS web link given by admin.
2. Login with your assigned username and password.
3. Use the left side menu to open your department screen.
4. Use search boxes to find patient, bill, appointment, item, or order.
5. Fill required details carefully. Do not guess medical, billing, or identity information.
6. Click the main button such as **Register Patient**, **Book Appointment**, **Save Results**, or **Collect Payment**.
7. Read success or error message shown on screen. If an error appears, correct the details and try again.
8. Logout or lock the computer when leaving the desk.

Common Menu Items

Menu	Used for	Main users
Dashboard	Overall hospital summary and quick notes.	All allowed users
Patients	Patient registration, search, profile, documents, history.	Reception, doctors, nursing, pharmacy, lab, accounts, HR
Appointments	Doctor appointment booking, slots, queue, cancellation.	Reception, admin, doctors
Calendar	Hospital events, reminders, follow-ups, therapy and operational tasks.	Most operational roles
OPD	OPD queue, vitals, doctor consultation, prescription, lab order, OPD billing, discharge summary.	Reception, doctors, nursing
Billing	Manual bills, payments, invoices, receipt history.	Accounts, reception, admin, doctors
IPD	Admission, bedside notes, vitals, IPD therapies, discharge and stay bill.	Reception, doctors, nursing, accounts
Panchkarma	Therapy scheduling, execution, material use, therapy billing.	Therapists, doctors, reception, accounts
Rooms	Room/bed availability, bed assignment, discharge/cleaning status.	Reception, nursing, admin, accounts
Laboratory	Lab order board, sample collection, result entry, report print, lab invoice.	Lab, doctors, reception, accounts
Pharmacy	Prescription queue, dispensing, stock receiving, stock alerts, pharmacy invoice link.	Pharmacy, doctors, accounts
Inventory	Hospital store items, non-pharmacy stock movement and ledger.	Admin, accounts, nursing, HR, housekeeping
HR	Staff profile, attendance, leave, duty roster, payroll, documents.	HR and admin
Users	Staff directory and role mix.	Admin and HR
Reports	Operational, finance, pharmacy, lab, Panchkarma, OPD and IPD reports.	Admin and department leads

3. Role-Wise Training Guide

Reception / Front Desk

Main responsibility: Patient entry, appointment booking, queue control, basic OPD/IPD coordination, and some billing support.

Daily flow

1. Open **Patients** and search by UHID, registration number, OPD/IPD number, phone, ID number, father name, or patient name.
2. If patient is new, click **Add Patient** and enter patient type, name, father name, DOB, gender, phone, address, ID details, emergency contact, and referred by.
3. Open **Appointments**, select existing patient, doctor, department, date, time slot, type, source, and problem.
4. Watch **Reception queue board** for today's patients.
5. In **OPD**, start or load consultation when patient reaches OPD desk.
6. If allowed at your desk, generate OPD bill or guide patient to accounts.
7. For admitted patient, coordinate **IPD** admission and room/bed assignment.

Do and do not

- Do search first before adding a patient.
- Do enter correct mobile number because later search and communication depend on it.
- Do not create duplicate patient records for follow-up visits.
- Do not cancel appointments unless requested by patient, doctor, or authorized staff.

Screening / Nursing Desk

Main responsibility: Record patient vitals before or during OPD/IPD care.

OPD screening flow

1. Open **OPD** and choose the patient from the OPD queue.
2. Click start/load consultation if required.
3. Enter vitals: BP, pulse, temperature, weight, height, SPO2, and respiratory rate.
4. Click **Save Vitals**. The visit is forwarded for doctor consultation.

IPD nursing flow

1. Open **IPD** and select active admission.
2. Add progress notes when required.
3. Record bedside vitals: BP, pulse, temp, SPO2, RR, weight, and notes.
4. Check scheduled therapies and bed/room status.

Doctors

Main responsibility: Clinical assessment, diagnosis, prescription, lab order, therapy advice, follow-up, and visit completion.

OPD consultation flow

1. Open **OPD** and filter by doctor if needed.
2. Select patient from queue and load the visit.
3. Review patient details, complaint, and vitals.
4. Enter Ayurvedic assessment such as prakriti, nadi pariksha, agni, kosktha, vikriti, and observations.
5. Enter diagnosis, complaints, medicines, dose, frequency, route, duration, anupana, and instructions.
6. Add diet, lifestyle, yoga, Panchkarma, specialized therapy, investigation advice, and follow-up date.
7. Create lab order if tests are required.
8. Save discharge summary or print patient copy when needed.
9. Generate OPD bill if allowed, or ask accounts/reception to bill.
10. Click **Complete Visit** only after consultation is final.

Good practice

- Save prescription before sending patient to pharmacy.
- Create lab order before asking patient to go to laboratory.
- Use clear medicine instructions so pharmacy and patient can understand.

Laboratory

Main responsibility: Receive lab orders, collect samples, enter results, print reports, and create lab invoice if needed.

1. Open **Laboratory**.
2. Select the lab order from **Lab Register / Order board**.
3. Check patient information, ordered tests, doctor, and priority.
4. Enter sample type, collection time, and collection note.
5. Click **Collect Sample**.
6. Enter processing summary and test results, including value, flag, and remarks.
7. Click **Save Results**.
8. Use **Print Report** to give the patient or doctor a printed copy.
9. Create lab invoice from the billing link if the lab order is not already billed.

Pharmacy

Main responsibility: Dispense prescribed medicines, maintain stock, receive batches, and review stock alerts.

1. Open **Pharmacy**.
2. Select prescription from **Prescription Queue**.
3. Review patient name, doctor, medicines, dose, duration, and instructions.
4. Check stock alerts before dispensing.
5. Dispense medicine lines and complete the prescription.
6. For new stock, use **Receive Stock** and enter medicine, supplier, batch number, expiry date, quantity, purchase price, selling price, and note.
7. Review **Recent Dispensing** for completion history.

Pharmacy caution: Always verify medicine name, batch, expiry, and quantity before handing medicine to patient.

Panchkarma / Therapist

Main responsibility: Schedule, start, complete, and bill therapy sessions with material usage tracking.

1. Open **Panchkarma**.
2. For new session, select patient, therapy, therapist, recommended by, room, date, time, duration, recovery bed if needed, complaint, and preparation notes.
3. Click **Schedule Session**.
4. Use **Daily Board** to see the day's therapy queue.
5. Select session and click start when patient arrives.
6. Enter execution notes, outcome, follow-up advice, session charge, payment status, and materials used.
7. Click **Complete Session**.

Accounts / Billing

Main responsibility: Create invoices, collect payments, print receipts, and monitor balance amounts.

1. Open **Billing**.
2. To create manual invoice, choose patient and bill type.
3. Add discount, tax, notes, doctor details, patient address override if needed, and bill items.
4. For each item, enter description/product name, category, quantity, unit price, and pharmacy batch/expiry details if pharmacy bill.
5. Click **Create Bill**.
6. Select bill from **Bill register**.
7. For payment, enter amount, payment mode, reference number, and note.
8. Click **Collect Payment**.
9. Click **Print Invoice** when patient needs copy.

Billing caution: Discounts, refunds, and corrections must follow hospital approval policy. Add clear reason notes.

IPD / Ward Team

Main responsibility: Manage admission, bed, daily notes, vitals, therapy, discharge, and IPD billing.

1. Open **IPD** and use **Admit Patient**.
2. Select patient, room, bed, attending doctor, admission source, date, time, expected discharge, reason, diagnosis, and initial note.
3. Click **Admit Patient**.
4. Select the admission from **IPD register**.
5. Add clinical notes and bedside vitals regularly.
6. Schedule IPD therapy if prescribed.
7. At discharge, enter date, time, status, condition, stay days override if needed, bed status after discharge, extra charge, discharge summary, advice, and bed note.
8. Tick **Create IPD bill on discharge** when billing should be generated.
9. Click **Discharge Patient**.

Rooms / Housekeeping

Main responsibility: Keep bed status clear so reception and IPD staff know what is available.

1. Open **Rooms**.
2. Check room register for available, occupied, cleaning, and maintenance beds.
3. Select a room, then select bed.
4. For available bed, assign patient and enter admission type, expected discharge, and note.
5. For occupied bed, discharge bed and set next status: cleaning, available, or maintenance.
6. Use cleaning status until room is ready for next patient.

Inventory / Store

Main responsibility: Track non-pharmacy hospital items such as linen, housekeeping material, equipment, and consumables.

1. Open **Inventory**.
2. Create item with name, category, department, unit, opening quantity, reorder level, location, supplier, purchase price, and notes.
3. Use **Stock Movement** for receipt, issue, or adjustment.
4. Enter item, type, quantity, department, reference number, and note.
5. Click **Update Stock**.
6. Review hospital store and movement history regularly.

HR

Main responsibility: Maintain staff records, attendance, leave, duty roster, payroll, and documents.

1. Open **HR**.
2. Create or update employee profile with joining date, employment type/status, emergency contact, salary, and notes.
3. Review daily attendance sheet and department attendance.
4. Add leave entry with employee, leave type, start date, end date, and reason.
5. Create shifts with name, start, end, break minutes, and grace minutes.
6. Assign employee to shift with effective date and week off.
7. Add payroll with employee, month, basic salary, allowances, deductions, and status.
8. Add employee document metadata such as type, name, number, issue date, expiry date, and file URL.

Admin / Management

Main responsibility: Supervise system usage, users, roles, reports, approvals, and operational quality.

1. Use **Users** to review imported staff directory and department/role mix.
2. Use **Reports** for daily OPD, IPD census, revenue, pharmacy sales, lab workload, and Panchkarma performance.
3. Check duplicate patient problems, unpaid bills, stock alerts, pending lab results, and incomplete visits.
4. Approve high-value discounts, refunds, billing corrections, and stock adjustments as per hospital policy.
5. Make sure staff use their own login. Do not allow shared passwords.

4. Module-Wise Quick Instructions

Patients

Task	Steps	Responsible roles
Search patient	Patients -> type UHID, reg no., OPD/IPD no., phone, ID number, father name, or name -> Search -> View.	Most roles with patient access
Register patient	Patients -> Add Patient -> fill demographic/contact/identity/emergency details -> Register Patient.	Reception, admin
Upload old records	Patient profile -> Documents -> enter title/type/notes -> choose PDF -> Upload.	Admin, reception, doctor, nursing
Review history	Patient profile -> Timeline, Appointments, Prescriptions, IPD, Panchkarma, lab, billing, pharmacy.	All patient care departments

Appointments

Task	Steps
Book appointment	Appointments -> select patient or enter walk-in details -> choose doctor/department/date/time/type/source/problem -> Book Appointment.
Cancel appointment	Appointment list -> find appointment -> Cancel. Use only when authorized.
Check queue	Appointments -> Today queue board shows token, patient, department, time, and status.

OPD

Task	Steps
Start visit	OPD -> select patient in queue -> Start/Load consultation.
Record vitals	Enter BP, pulse, temp, weight, height, SPO2, RR -> Save Vitals.
Doctor assessment	Enter Ayurvedic assessment, diagnosis, medicines, diet, lifestyle, therapy, investigations, follow-up -> Save.
Lab order	Select priority and tests -> Create Lab Order.
OPD bill	Choose consultation/lab charge options and payment status -> Generate Bill.
Close visit	After all clinical work is done -> Complete Visit.

Laboratory

Task	Steps
Collect sample	Laboratory -> select order -> enter sample type, collection time, note -> Collect Sample.
Enter results	Enter processing summary, result values, flags, remarks -> Save Results.
Print report	Select completed order -> Print Report.
Create lab invoice	Billing Link -> choose payment status -> Create Bill if no bill exists.

Pharmacy

Task	Steps
Dispense prescription	Pharmacy -> select prescription -> review medicines -> dispense/complete.
Receive stock	Receive Stock -> enter medicine, supplier, batch, expiry, quantity, purchase/selling price -> Receive Pharmacy Stock.
Monitor stock	Review Stock Alerts and recent dispensing history.

Billing

Task	Steps
Create bill	Billing -> choose patient and bill type -> add items, discount, tax, notes -> Create Bill.
Collect payment	Select bill -> amount, payment mode, reference number, note -> Collect Payment.
Print invoice	Select bill -> Print Invoice.

IPD and Rooms

Task	Steps
Admit patient	IPD -> select patient, room, bed, doctor, source, dates, reason, diagnosis -> Admit Patient.
Record ward work	Select admission -> add notes, vitals, and therapies.
Discharge patient	Fill discharge details, advice, bed note, bill option -> Discharge Patient.
Manage bed	Rooms -> choose bed -> Assign or Discharge -> set cleaning/available/maintenance.

5. Permissions Summary

Some buttons are hidden or disabled depending on the logged-in role. If a staff member cannot see a screen or button, they should contact admin or HR instead of using another person's login.

Area	Main allowed roles	Notes
Patient search/profile	Admin, reception, doctor, pharmacy, lab, therapist, nursing, housekeeping, accounts, HR	Broad access for patient service continuity.
Patient registration	Admin, reception	Only front desk/admin should create patient records.
Appointments	Admin, reception, doctor	Booking/cancellation mainly reception/admin.
OPD	Admin, reception, doctor, nursing	Doctor-only clinical documentation for assessment/prescription.
Billing	Admin, accounts, reception, doctor	Payment collection mainly accounts/reception/admin.
IPD	Admin, accounts, reception, doctor, nursing	Ward and admission coordination.
Panchkarma	Admin, accounts, reception, doctor, therapist	Execution mainly therapist/doctor/admin.
Rooms	Admin, accounts, reception, doctor, nursing	Bed status must be updated immediately.
Laboratory	Admin, doctor, reception, lab, accounts	Sample/result work mainly lab.
Pharmacy	Admin, pharmacy, doctor, accounts	Stock receiving/dispensing mainly pharmacy/admin.
Inventory	Admin, accounts, nursing, HR, housekeeping	General store only, not pharmacy medicines.
HR and Users	Admin, HR	Employee and user management.
Reports	Admin, doctor, accounts, lab, therapist, reception, nursing, pharmacy	Used for department monitoring.

6. Daily Closing Checklist

Department	Before leaving for the day
Reception	All arrived patients registered, appointments correct, cancellations updated, no duplicate patient entries created.
Nursing/Screening	Vitals saved for all screened patients, IPD bedside vitals updated, pending notes informed to doctor.
Doctors	Consultations completed, prescriptions saved, lab orders created, discharge summaries saved/printed where needed.
Laboratory	Samples collected status updated, results saved, urgent reports communicated, pending orders reviewed.
Pharmacy	Prescriptions dispensed/closed, low-stock alerts checked, received stock entered with batch and expiry.
Panchkarma	Sessions completed or rescheduled, materials used entered, charges/payment status updated.
Accounts	Payments collected, unpaid/partial bills reviewed, invoices printed if requested, corrections noted for approval.
IPD/Rooms	Admissions active, bed status correct, discharges completed, cleaning/maintenance beds marked correctly.
Inventory	Receipts/issues/adjustments entered, low stock reviewed, references and notes added.
HR	Attendance, leave, roster, payroll, and document updates saved as required.

7. Data Quality and Safety Rules

- Use your own login only. Never share passwords.
- Search before creating a patient.
- Use correct spelling for patient name and father name.
- Enter phone numbers carefully; they are used for searching and communication.
- Do not leave required fields blank if the information is available.
- Do not use another department's role to bypass permission.
- For bills, refunds, discounts, and corrections, add notes and follow approval process.
- For pharmacy, verify batch, expiry, and quantity.
- For lab, verify patient and order before collecting sample.
- For discharge, confirm all clinical, billing, bed, and medicine steps are complete.

8. Common Problems and What to Do

Problem	What staff should do
Patient not found	Search by phone, father name, UHID, registration number, and alternate spelling. If still not found, ask reception/admin before creating new record.
Wrong patient selected	Stop before saving. Go back and select correct patient. Inform admin if wrong information was already saved.
Button is disabled	Your role may not have permission, or required information is missing. Ask the responsible department or admin.
Appointment slot not available	Select another available slot or another date. Emergency override is not generally allowed.
Bill already exists	Open Billing and review existing invoice instead of creating a duplicate.
Lab result entered wrongly	Inform lab lead/admin immediately for correction process.
Medicine stock low or expired	Do not dispense from expired batch. Update stock and inform pharmacy lead/admin.
Bed still showing occupied after discharge	Open Rooms/IPD and set bed status to cleaning, available, or maintenance as applicable.

Training tip: During first week, each department should practice with sample patients under supervision before using the HMS independently on live patients.
